Disclaimer

This companion guide for the ANSI ASC X12N 834 transaction has been created for use in conjunction with the standard Implementation Guide. It should not be considered a replacement for the Implementation Guide, but rather used as an additional source of information. The companion guide contains data clarifications derived from specific business rules that apply exclusively to Medicaid processing for Washington State DSHS. The guide also includes useful information about sending and receiving data to and from the ProviderOne system.

Revision History

Documented revisions are maintained in this document through the use of the Revision History Table shown below. All revisions made to this companion guide after the creation date are noted along with the date, page affected, and reason for the change.

Revision Level	Date	Page	Description	Change Summary
WAMMIS-CG834-00-00-01	01/14/08		Initial Document	
WAMMIS-CG834-00-00-02	03/26/08	All	Template for deliverable	Updated the entire document to use a CNSI standard deliverable document
		i, ii,iv	Cover Page	Changed cover page to match CNSI Formal deliverable
		5	Section 1: Introduction Section 1.1: Document Purpose	Updated Introduction based on DSHS feedback. 834 enrollment file is generated weekly
		7	Section 2.1.2: Testing Process	Updated the testing process section based on DSHS feedback
		9	Section 2.2: Retrieve batches via Web Interface	Updated screenshots based on DSHS feedback
		17	Section 3: Transaction Specifications	Updated table based on updated mapping document
	04/02/08		Re-delivery to DSHS	Revisions made based on DSHS feedback
WAMMIS-CG834-00-00-03	04/18/08		Incorporated DSHS comments, Updated Table of Contents	
WAMMIS-CG834-00-00-04	05/14/08	20	Updated Transaction Specifications Comments	Updated Comments columns for Element Name Maintenance Reason Code and Employment Status Code.

1 Introduction

The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, Title II) includes requirements that national standards be established for electronic health care transactions, and national identifiers for providers, health plans, and employers. This requires Washington State Department of Social and Health Services (DSHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions between covered entities (health care providers, health plans, and healthcare clearinghouses).

The intent of these standards is to improve the efficiency and effectiveness of the nation's health care system by encouraging widespread use of electronic data interchange standards in health care. The intent of the law is that all electronic transactions for which standards are specified must be conducted according to the standards. These standards were not imposed arbitrarily but were developed by processes that included significant public and private sector input.

1.1 Document Purpose

Companion Guides are used to clarify the exchange of information on HIPAA transactions between the DSHS ProviderOne system and its trading partners. DSHS defines trading partners as covered entities that either submit or retrieve HIPAA batch transactions to and from ProviderOne.

This Companion Guide provides information about the 834 Enrollment file that is specific to DSHS and DSHS trading partners. It will include both the 834 Audit and 834 Update. This Companion Guide is intended for trading partner use in conjunction with the ANSI ASC X12N National Implementation Guide listed below. The ANSI ASC X12N Implementation Guides can be accessed at <http://www.wpc-edi.com>.

- ASC X12N 834 (004010X095)
- ASC X12N 834 (004010X095A1) (Addenda)

1.1.1 Intended Users

Companion Guides are intended for members of the technical staffs of trading partners who are responsible for electronic transaction/file exchanges.

1.1.2 Relationship to HIPAA Implementation Guides

Companion Guides are intended to supplement the HIPAA Implementation Guides for each of the HIPAA transactions. Rules for format, content, and field values can be found in the Implementation Guides. This Companion Guide describes the technical interface environment with DSHS, including connectivity requirements and protocols, and electronic interchange

procedures. This guide also provides specific information on data elements and the values required for transactions sent to or received from DSHS.

Companion Guides are intended to supplement rather than replace the standard Implementation Guide for each transaction set. The information in these documents is not intended to:

- Modify the definition, data condition, or use of any data element or segment in the standard Implementation Guides.
- Add any additional data elements or segments to the defined data set.
- Utilize any code or data values that are not valid in the standard Implementation Guides.
- Change the meaning or intent of any implementation specifications in the standard Implementation Guides.

1.2 Transmission Schedule

834 Audit files will be posted a day after the Medicaid Enrollment Cut Off Date. The 834 Update files will be posted every Friday at 8 AM PST

2 Technical Infrastructure and Procedures

2.1 Technical Environment

2.1.1 Communication Requirements

This section will describe how trading partners will receive 834 Transactions from DSHS using 2 methods:

- Secure File Transfer Protocol (SFTP)
- ProviderOne Web Portal

2.1.2 Testing Process

Completion of the testing process must occur prior to production electronic retrieval from ProviderOne. Testing is conducted to ensure the following for maintaining HIPAA guidelines:

1. Syntactical integrity: Testing of the EDI file for valid segments, segment order, element attributes, testing for numeric values in numeric data elements, validation of X12 or NCPDP syntax, and compliance with X12 and NCPDP rules.
2. Syntactical requirements: Testing for HIPAA Implementation Guide-specific syntax requirements, such as limits on repeat counts, used and not used qualifiers, codes, elements and segments. It will also include testing for HIPAA required or intra-segment situational data elements, testing for non-medical code sets as laid out in the Implementation Guide, and values and codes noted in the Implementation Guide via an X12 code list or table.

Additional testing may be required in the future to verify any changes made to the ProviderOne system. Changes to the ANSI formats may also require additional testing. Assistance is available throughout the testing process.

Trading Partner Testing Procedures

1. ProviderOne companion guides and trading partner enrollment package are available for download via the web at <http://maa.dshs.wa.gov/dshshipaa>
2. The Trading Partner completes the Trading Partner Agreement and submits the signed agreement to DSHS.

Submit to: Provider Enrollment
 PO Box 45562
 Olympia, WA 98504-5562

****For Questions call 1-800-562-3022 option 2, then option 5****

3. The trading partner is assigned a Submitter ID, Domain, Logon User ID and password.
4. ProviderOne system processes and validates all outbound HIPAA test files. It will be available for download via the ProviderOne web portal or Secure File Transfer Protocol (SFTP).
 - Web Portal URL: <https://www.waproviderone.org/edi>
 - SFTP URL: <sftp://ftp.waproviderone.org/>
5. The trading partner downloads the file from the ProviderOne web portal or Secure File Transfer Protocol (SFTP).
6. If the test file download is successful and the trading partner's system accepts the file for processing, the trading partner is approved for transaction download in the ProviderOne production environment.
7. If the test file download is unsuccessful, the trading partner should immediately call 1-800-562-3022 to report the failure. They will continue testing in the testing environment until a successful download is completed.

2.1.3 Who to contact for assistance

- Telephone Number: 1-800-562-3022
 - Select option 2
 - Select option 4
- All calls result in the assignment of a Ticket Number for problem tracking
- Hours: 8:00 AM – 5:00 PM Pacific Standard Time, Monday through Friday
- Information required for initial call:
 - Topic of Call (setup, procedures, etc.)
 - Name of caller
 - Submitter ID Number
 - Organization of caller
 - Telephone number of caller
 - Nature of problem (connection, receipt status, etc.)
- Information required for follow up call(s):
 - Assigned Ticket Number

2.2 Retrieve batches via Web Interface

Once logged into the ProviderOne Portal, select the Admin Tab and the following options will be presented to the user:

The screenshot shows the ProviderOne Admin interface. At the top, there is a navigation bar with tabs: My Inbox, Admin, Provider, Claims, Reference, Client, TPL, Drug Rebate, Rate Setting, PA, Managed Care, Cash Receipt, and Payroll. Below the tabs, a welcome message reads: "Welcome Administrator, Super. You have logged-in with Super Administrator profile." To the right of the message is a "Links: --Select--" dropdown menu. Below the message is a "Path: MyInbox" label. A "Menu" button is visible on the left. The main content area displays a table of options under the heading "Choose an Option.".

Choose an Option.	
Domain Maintenance	Option to Maintain the Domain
User Maintenance	Option to Maintain the Users in the System
OrgUnit Maintenance	Option to Maintain Organization Units
AuditTrail Maintenance	Option to Maintain Audit Trail
Policy Impact	Impact of Role/Profile on various entities.
Data Dictionary Online	Option to view Data Dictionary Information
Broadcast Message	Create Broadcast Message
Alert Library Maintenance	Alert Library Maintenance
HIPAA	To Manage HIPAA transactions
Reports	Reports
Security Setup	Setting up the profiles and Roles
List of Active Users	To List Active Users as of today in System.
Interface Maintenance	Interface Maintenance

At the bottom of the interface, there is a status bar with the following information: Page ID: pgSubMenu(Menu), Environment: SysTst, Server Time: 12/14/2007 11:27:55 EST, Done, Local intranet, and 100% zoom.

Click on the HIPAA option to manage the HIPAA transactions.

In the HIPAA Transaction Management screen, the user can Upload file and Retrieve Acknowledgement/Response as shown below:

ProviderOne

My Inbox Admin Provider Claims Reference Client TPL Drug Rebate Rate Setting PA Managed Care Cash Receipt Payroll

Welcome Administrator, Super - You have logged-in with Super Administrator profile. Links: --Select--

Path: MyInbox

2.3 Set-up, Directory, and File Naming Convention

2.3.1 SFTP Set-up

Trading partners can contact 1-800-562-3022 for information on establishing connections through the FTP server. Upon completion of set-up, they will receive additional instructions on FTP usage.

2.3.2 SFTP Directory Naming Convention

There would be two categories of folders under Trading Partner's SFPT folders:

1. **TEST – Trading Partners should submit and receive their test files under this root folder**
2. **PROD – Trading Partners should submit and receive their production files under this root folder**

Following folder will be available under TEST/PROD folder within SFTP root of the Trading Partner:

'HIPAA Inbound' - This folder should be used to drop the Inbound files that needs to be submitted to DSHS

'HIPAA Ack' - Trading partner should look for acknowledgements to the files submitted in this folder. TA1, 997 and custom error report will be available for all the files submitted by the Trading Partner

'HIPAA Outbound' – X12 outbound transactions generated by DSHS will be available in this folder

'HIPAA Error' – Any inbound file that is not HIPAA compliant or is not recognized by ProviderOne will be moved to this folder

Folder structure will appear as:

2.3.3 File Naming Convention

The HIPAA Subsystem Package is responsible for assisting ProviderOne activities related to Electronic Transfer and processing of Health Care and Health Encounter Data, with a few exceptions or limitations.

HIPAA files are named:

For Outbound transactions:

HIPAA.<TPId>.<datetimestamp>.<TxID>.O.<out>

Example of file name: HIPAA.165760000.12262007211315.834.O.out

- <TPId> is the Trading Partner Id
- <datetimestamp> is the Date timestamp
- <TxID> is the Transaction Id.

2.4 Transaction Standards

2.4.1 General Information

HIPAA standards are specified in the Implementation Guide for each mandated transaction and modified by authorized Addenda. Currently, the 834 Enrollment has one Addendum. This Addendum has been adopted as final and is incorporated into DSHS requirements.

An overview of requirements specific to each transaction can be found in the 834 Implementation Guide. Implementation Guides contain information related to:

- Format and content of interchanges and functional groups
- Format and content of the header, detailer and trailer segments specific to the transaction
- Code sets and values authorized for use in the transaction
- Allowed exceptions to specific transaction requirements

Transmission sizes are limited based on two factors:

- Number of Segments/Records allowed by HIPAA standards
- DSHS file transfer limitations

HIPAA standards for the maximum file size of each transaction set are specified in the 834 Implementation Guide. The 834 Implementation Guide recommends a limit of 10,000 INS Member Level Detail Segments in the 2000 Member Level Detail Loop.

DSHS has no size limitations for postings to its FTP Server.

834 Transactions

The DSHS translator maintains segment counts and will automatically limit 834 Transactions (data between ST and SE Segments) to 10,000 INS Segments. As MCOs and RSNs might have greater than 10,000 members they might receive 834 files with multiple transaction sets within a functional group.

2.4.2 Data Format

Delimiters

The ProviderOne will use the following delimiters on outbound transactions:

- Data element separator, Asterisk, (*)
- Sub-element Separator, Vertical Bar, (:)
- Segment Terminator, Tilde, (~)

Dates

The following rules apply to any dates in the 834 transaction:

- For the 834 transaction, all dates will be formatted according to Year 2000 compliance, CCYYMMDD, except for the ISA09 element where the date format is YYMMDD.
- The only value acceptable for "CC" (century) is 20. The exception to this rule is for any of the Date of Birth values.
- Time is in military time format, 1 to 24 to indicate hours and 00 to 59 to indicate minutes and/or seconds. ISA10 and GS05 elements are formatted HHMM (ie 2115 defines the time of 9:15 p.m). BGN04 element is HHMMSS (ie 211515 defines the time of 9:15:15 p.m.).
- No spaces or character delimiters should be used in presenting dates or times.
- Dates that are logically invalid (e.g. 20071301) are rejected.
- Dates must be valid within the context of the transaction. For example, a Member's Birth Date cannot be after the file effective date or the Member level dates or the Coverage level dates.

Field Length

HIPAA regulations specify field lengths for all of the data elements of the 834 Benefit Enrollment and Maintenance transaction. For some of these data elements, ProviderOne processes fewer characters than the maximum allowed. The Transaction Specifications in section 5 display the ProviderOne field lengths.

Phone Numbers

Phone numbers are presented as contiguous number strings, without dashes or parenthesis markers. For example, the phone number (800) 555-1212 should be presented as 8005551212. Area codes should always be included.

2.4.3 Data Interchange Conventions

When transmitting 834 Transactions, DSHS follows standards developed by the Accredited Standards Committee (ASC) of the American National Standards Institute (ANSI). These standards involve Interchange (ISA/IEA) and Functional Group (GS/GE) Segments or "outer envelopes". All 834 Transactions are enclosed in transmission level ISA/IEA envelopes and, within transmissions, functional group level GS/GE envelopes. The segments and data elements used in outer envelopes are documented in Appendix B1 of the 834 Implementation Guide. Specific information on how individual data

elements are populated by DSHS on ISA/IEA and GS/GE envelopes are shown in the table beginning later in this section.

The ISA/IEA Interchange Envelope, unlike most ASC X12 data structures has fixed field length. The entire data length of the data element should be considered and padded with spaces if the data element length is less than the field length.

Example of ISA with the entire data length with padded spaces:

```
ISA*00*          *00*          *ZZ*123456789   *ZZ*77045  
*040303*1300*U*00401*000001001*1*T*:~
```

DSHS transmits 834 Transaction files with single ISA/IEA and GS/GE envelopes. 834 Enrollment Transactions, with their limit of 10,000 members per transaction, sometimes have multiple transactions (as defined by ST and SE Segments) within the same GS/GE envelope.

2.4.4 Acknowledgement Procedures

N/A

2.4.5 Rejected Transmissions and Transactions

DSHS will validate all 834 transactions up to HIPAA validation levels 1 and 2. If a receiver rejects any part of a transmission, they must reject the entire transmission. Data on rejected 834 transmissions should not be used to update receiver's databases as DSHS will resend a corrected full-file replacement. DSHS transmits 834 Transactions within a single functional group, even when multiple transactions (ST through SE Segments) are required.

3 Transaction Specifications

Page	Loop	Segment	Data Element	Element Name	Comments
Interchange Control Header					
App. B	Header	ISA	01	Authorization Information Qualifier	This field will be populated with '00' – No Authorization information.

4 Reporting of Dates in the 834

Dates reported on the 834 will vary based on the type of file being sent, i.e. Audit or Update. Within the Update file the dates reported will vary dependent upon the nature of the transaction, i.e. enrollment, disenrollment, change to coverage, or a demographic change that does not impact coverage. Please see the table below for a detailed definition of usage.

Monthly 834 Audit File				
Transaction Type	Maintenance Type Code	Loop, Segment,	Date Qualifier	Notes
Audit	'030' Audit	Loop 2000, DTP01	Not Reported	Loop 2000 Member level dates are not returned on an Audit File
Audit	'030' Audit	Loop 2300, DTP01	'303' – Audit File effective date of plan coverage	'303' is used on an Audit File when there is no change from previous month
Audit	'030' Audit	Loop 2300, DTP01	'348' – Health Plan Coverage Begin Date	'348' is used on an Audit File when the member was not reported on the previous months Audit File

Monthly 834 Update File				
Transaction Type	Maintenance Type Code	Loop, Segment,	Date Qualifier	Notes
Audit	'030' Audit	Loop 2000, DTP01	Not Reported	Loop 2000 Member level dates are not returned on an Audit File

Audit	'030' Audit	Loop 2300, DTP01	'303' – Audit File effective date of plan coverage	'303' is used on an Audit File when there is no change from previous month
Audit	'030' Audit	Loop 2300, DTP01	'348' – Health Plan Coverage Begin Date	'348' is used on an Audit File when the member was not reported on the previous months Audit File
Change impacting coverage	'001' Change (Change that impacts Coverage)	Loop 2000, DTP01	Not Reported	When reporting a change to coverage in an Update File Loop 2000 Member Level Dates are not returned.
Change impacting coverage	'001' Change (Change that impacts Coverage)	Loop 2300, DTP01	'303' - Update File effective date of plan coverage	'303' is used on an Update File at Loop 2300 Health Coverage Level Dates to identify that the change impacted coverage and to deliver the File effective date.

Change impacting coverage	'001' Change (Change that impacts Coverage)	Loop 2300, DTP01	'348' – Health Plan Coverage Begin Date	'348' is used on an Update File at Loop 2300 Health Coverage Level Dates to identify that the change impacted coverage and to deliver the updated Health plan coverage begin date.
Change that does <u>not</u> impact coverage	'001' Change (Change that does <u>not</u> impact Coverage)	Loop 2000, DTP01	'303' – Maintenance Effective	'303' is used on an Update File at Loop 2000 Member Level Date to identify the effective date of the change.
Change that does <u>not</u> impact coverage	'001' Change (Change that does <u>not</u> impact Coverage)	Loop 2300, DTP01	Not Reported	When reporting a change that does not impact coverage, Loop 2300 is not returned per the IG.
Enrollment	'021' Addition	Loop 2000, DTP01	'473' – Medicaid Eligibility Begin Date	For new enrollees '473' will be used at Loop 2000 Member Level Date to pass the member's <u>Medicaid</u> eligibility begin date

Enrollment	'021' Addition	Loop 2300, DTP01	'348' – Health Plan Coverage Begin Date	For new enrollees '348' will be used at Loop 2300 Health Coverage Level Date to pass the member's <u>Health Plan Coverage</u> eligibility begin date
Disenrollment	'024' Termination	Loop 2000, DTP01	'474' – Medicaid Eligibility End Date	Loop 2000 Member level date will only be used when the termination of eligibility with the plan is due to loss of Medicaid eligibility – otherwise Loop 2000 Member level dates will not be populated on disenrollments.
Disenrollment	'024' Termination	Loop 2300, DTP01	'349' – Health Plan Coverage End Date	For dis- enrollments '349' will be used at Loop 2300 Health Coverage Level Date to pass the member's Health Plan coverage end date.
